About NOXXON Pharma AG, the next generation aptamer company:

Based on one of the largest and best protected patent portfolio, Berlin-based NOXXON Pharma AG develops biostable aptamers, novel substances based on mirror image nucleic acids. These so-called Spiegelmers® (the German word "Spiegel" means mirror) bind highly specific to the pharmacologically relevant target for which they were selected. Thanks to their structural characteristics, Spiegelmers® are extremely resistant to degradation and not immunogenic - a new generation of improved therapeutics.
